QFS TRUST

QUANTUM FINANCIAL SYSTEM TRUST

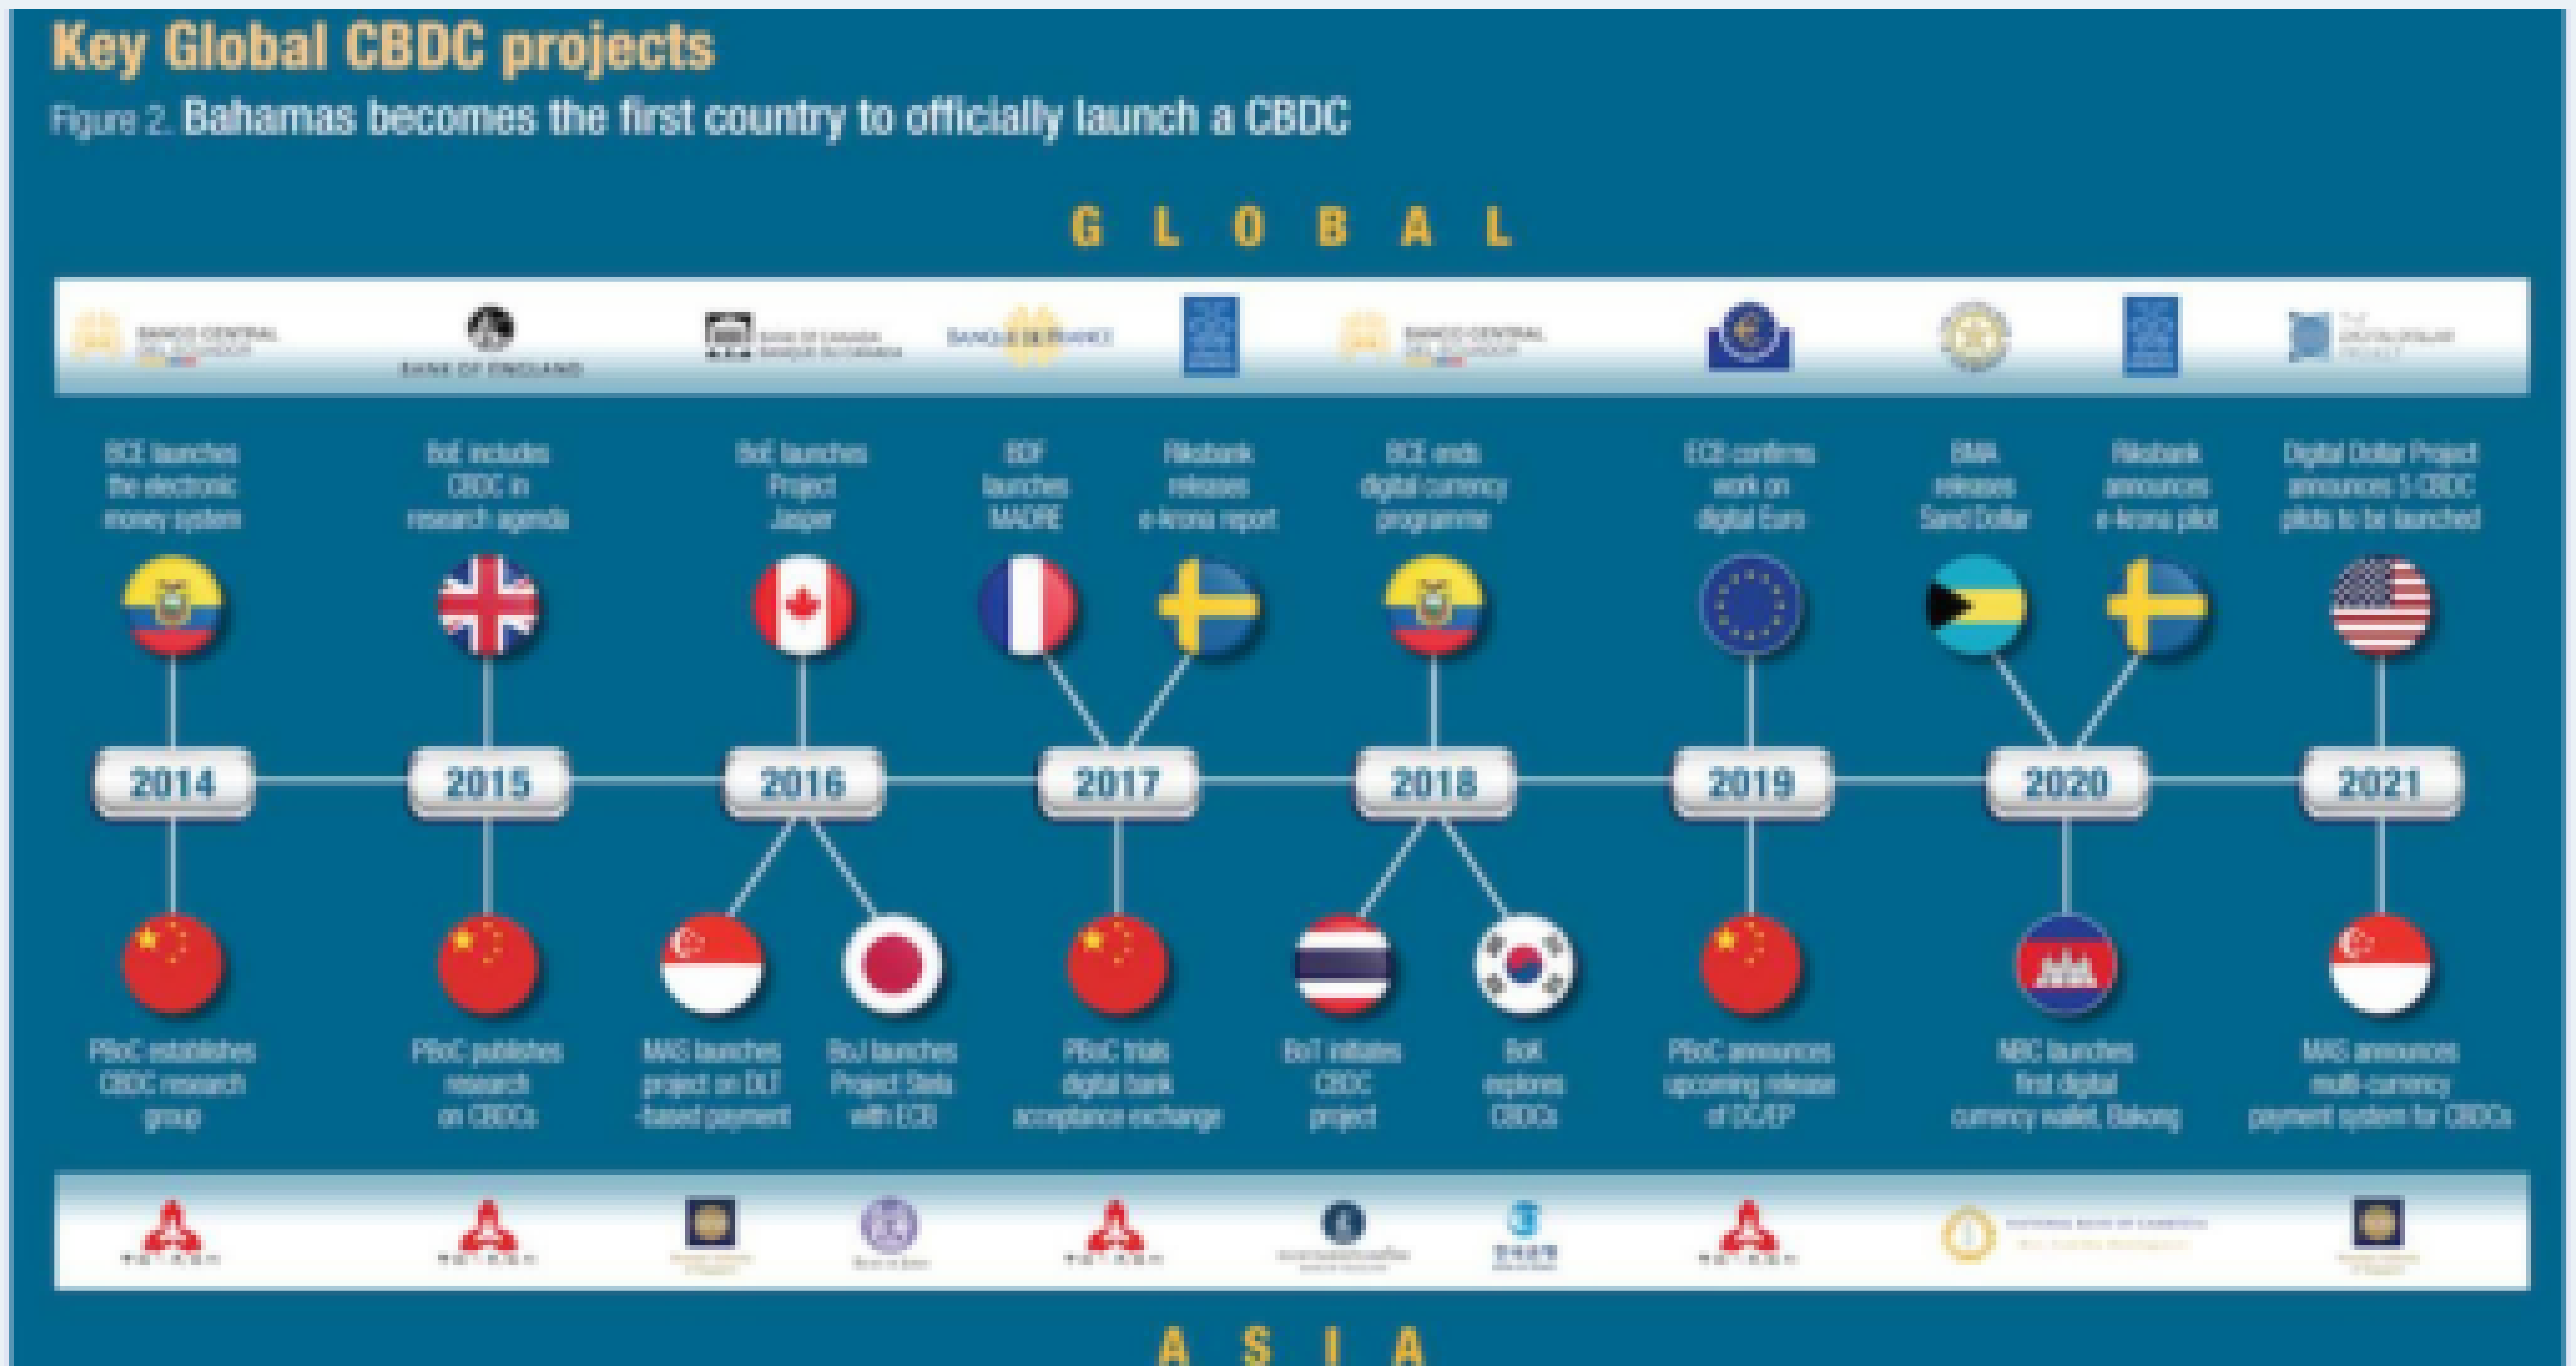

THE ACT

PREFACE

The Quantum Financial System (QFS) is upon us! Regulated ISO 20022 Cryptos like these below will change the world and EXPLODE really soon. The central banks are using them for the new QFS. Cryptos like **XRP, XLM, XDC, ALGO, IOTA, SHX** also Gold and Silver, Let me tell you more if you are interested

Nesara states Rainbow "Treasury" Tokens (XRP and XLM) backed by precious metals, Adding Quantum & ISO20022 Internationally Regulated USA Coins also backed by metals.

KEY GLOBAL CBDC PROJECTS

GESARA

Global Economic Security and Reformation Act

QFS TRUST

Financial Services

Capital Markets

Trade Finance

Banking

Insurance

Payments & Lending

KYC & AML

Once it commences, It forgives all credit card, mortgage, and others due to illegal banking AND government activities, dissolves the IRS and as well abolishes income taxes. The moment fiat (\$) goes down, a new Treasury currency backed by Gold (XRP) and Silver(XLM) and other precious metals will be created which would later initiate the global economic reform.

QFS TRUST

Money and banks are tools of the cabal to control us, with their debt-based economy which can never bring prosperity.

Consequently, paper money and banks will eventually disappear. Document properties 2 3 STO 4 Coinage will not. XRP/Gold, XLM/Silver, etc can and likely will replace the SWIFT system for instant international monetary settlement. Fiat can be stolen, directly and indirectly. The Federal Reserve is the unrestricted central control/decision making/manipulators of Fiat

Stop watching TV!
**It is a Global Military
Intelligence Operation.**

QFS TRUST

The Media is the last to fall. Libel
Laws..#ProjectOdin... Research. Don't expect the 6
o'clock news to tell you. #KnowYourEnemy. I give
you so much. See the patterns, join the dots.
The EBS (Disclosure of the Operation plus more) to
come when THE EVENT happens. Strathy following
the XRP Ripple Case. THE ISO20022 Regulation is
the big catalyst in the US vs China Tech War (The
Event is based around that as well as other things)

The XRP and XLM tokens are very necessary to
HODL at this point time in regards to the fact that
(they are backed by SILVER and GOLD.. And who
said we won't be able to TRANSACT with any of
them?,, The iso20022 tokens (XRP and XLM) are the
only tokens that will survive the great reset and
would emerge as the only means of financial
activities in the new QFS ..So definitely the
iso20022tokens would perform every transaction
processes when we finally witness the new QFS

The gist of which is that soon, all banks all over the world are using QFS (QUANTUM FINANCIAL SYSTEM), exclusively. Confirmed by a variety of sources in many positions of authority... No more SWIFT allowed. Period. Drop the mic and depart stage Left. No more discussion allowed. Any banks attempting to transfer money via SWIFT loses their ability to be in the banking/financial industry. The (White Hat) authorities are not fooling around. It's all about putting a final nail in the coffin for "Money Laundering" and corrupt bad acts.

When the population at large and the bad actors involved in illegal activity, learn that the QFS is tracking the movement of money for 50 moves (and more), they will break out in more than a sweat. The desperation will have set in, leading to (potentially) desperate acts. Hence all the doom and gloom warning videos and discussions about EMF attacks/power failure/videos and discussions about EMF attacks/power failure/blackouts, whatever the evil Cabal might entertain in retaliation, it's possible, but not probable. Federal Reserve Board announces the Reserve Banks will adopt a new message format for the Fedwire® Funds Service and invites public comment on proposal to expedite adoption

For release at 2:00 p.m. EDT

Share 

The Federal Reserve Board on Monday announced that the Federal Reserve Banks will adopt the ISO® 20022 message format for the Fedwire® Funds Service. The change will allow for enhanced efficiency of both domestic and cross-border payments, and a richer set of payment data that may help banks and other entities comply with sanctions and anti-money laundering requirements.

The Board also invited public comment on a revised plan for migrating the Fedwire Funds Service to the new message format. Specifically, the Board is proposing that the Reserve Banks adopt the new message format on a single day, rather than in three separate phases as previously proposed.

The Fedwire Funds Service is a real-time gross settlement system owned and operated by the Federal Reserve Banks. It enables businesses and financial institutions to transfer funds quickly and securely.

The ISO 20022 format was developed by the International Organization for Standardization, which is an independent, non-governmental organization that publishes standards for a broad range of industries.
